**Working Notes:**

1. Profit Sharing Ratio

Bharat's Share = 1/5

Remaining Share = 1-1/5 = 4/5

Ram's share = 4/5 \* 5/8 = 1/2

Laxman's share = 4/5 \* 3/8 = 3/10

**CKQ**

(5)

New Profit Sharing Ratio = 5:3:2

2. Distribution of Goodwill:

Sacrificing Ratio

$$\text{Ram} = \frac{5}{8} - \frac{1}{2} = \frac{5-4}{8} = \frac{1}{8} = \frac{5}{40}$$

$$\text{Laxman} = \frac{3}{8} - \frac{3}{10} = \frac{15-12}{40} = \frac{3}{40}$$

Sacrificing Ratio of Ram and Laxman = 5:3

$$\text{Ram} = 16,000 \times \frac{5}{8} = 10,000$$

$$\text{Laxman} = 16,000 \times \frac{3}{8} = 6,000$$

3. New Capital Required:

Bharat's Capital = 120,000, therefore total capital of the firm = Rs.120,000\*10/2 =

Rs. 600,000

Ram's required capital = Rs.600,000\*1/2 = Rs. 300,000

Laxman's required capital = Rs. 600,000\*3/10 = Rs.180,000

Bank Balance = Rs. 136,000+21030+22500-28500 = Rs. 151,030

- a) Hanuman Das Traders of Kathmandu purchased 10,000 pieces of Sarees @ Rs. 100 per Saree. Out of these Sarees, 6,000 Sarees were sent on consignment to Shrestha Traders of Nuwakot at the selling price of Rs. 120 per Saree. The consignors paid Rs. 3,000 for packaging and freight. Shrestha Traders sold 5,000 Sarees at Rs. 125 per Saree and incurred Rs. 1,000 for selling expenses and remitted Rs. 5,00,000 to Kathmandu on account. They are entitled to a commission of 5% on total sales plus a further 20% commission on any surplus price realised over Rs. 120 per Saree.

Owing to fall in market price, the value of stock of Sarees in hand is to be reduced by 10%.

Prepare the Consignment Account in the books of Hanuman Das Traders.

- b) Differentiate between:

(2×5=10)

- Meaning of shortworkings and their recoupment
- Del-credere Commission

**Answer:**

b)

**i) Meaning of shortworkings and their recoupment**

The excess of minimum rent over actual royalties earned by the landlord is known as shortworkings. If the minimum rent, for instance, is Rs.100,000 per annum and royalty is Rs.10 per ton, then 10,000 tons must be produced for minimum rent to be covered. In case the production happens to be only 5,000 tons, the shortworkings would be Rs. 50,000.

In order to be just with the lessee, it is usually provided in a contract of royalty that the lessee will be entitled to recover the shortworkings from the landlord during periods when the actual royalty exceeds the minimum rent. Such right of recoupment may be a fixed or fluctuating.

**ii) Del-credere Commission**

To increase the sale and to encourage the consignee to make credit sales, the consignor provides an additional commission generally known as del-credere commission. This additional commission when provided to the consignee gives a protection to the consignor against the bad debts. In other words, after providing the del-credere commission, bad debts. are no more the loss of consignor. Bad debt will be borne by the consignee. It is calculated on total sales unless there is any agreement between the consignor and the consignee to provide it on credit sales only.
